

Case Study: Oversight ADNOC \$10 Billion+ Development Programme

Situation

The Supreme Petroleum Council of Abu Dhabi wished to ensure effective governance of their multibillion USD development programme. The Projects Advisory Committee (PAC) of the Abu Dhabi National Oil Company was responsible in this regard. The PAC retained INDECO to provide assistance and counsel.

Approach

An INDECO Director was assigned full time to this function. Every significant project was reviewed for strategic fit and the appropriateness of the contracting strategy. INDECO then maintained an overview of the progress of the projects through their lifecycle; INDECO reported to the PAC on a systematic basis, signalled any emerging problems with recommendations on the actions to be taken. INDECO implemented recovery actions as required by the PAC.

Impact

The Development programme was executed to meet its strategic goals over the years INDECO was retained, any problems were resolved and budget and schedule objectives successfully achieved.
